Kaiser Health Tracking Poll: June 2011

June 2011

Methodology

This *Kaiser Health Tracking Poll* was designed and analyzed by public opinion researchers at the Kaiser Family Foundation led by Mollyann Brodie, Ph.D., including Liz Hamel, Sarah Cho, and Theresa Boston. The survey was conducted June 9 through June 14, 2011, among a nationally representative random sample of 1,203 adults ages 18 and older. Telephone interviews conducted by landline (803) and cell phone (400, including 174 who had no landline telephone) were carried out in English and Spanish by Princeton Survey Research Associates.

The margin of sampling error is plus or minus 3 percentage points. For results based on other subgroups, the margin of sampling error may be higher. Note that sampling error is only one of many potential sources of error in this or any other public opinion poll.

Trends in this document come from surveys listed on the last page.

Values less than 0.5% are indicated by an asterisk (*).

“VOL” indicates that a response was volunteered by respondent, not an explicitly offered choice.

Due to rounding, percentages may not add to 100.

1. Even though it is still a long way off, thinking about the campaign for the presidential election in 2012, what two issues would you most like to hear the presidential candidates talk about? IF RESPONDENT GIVES ONE ISSUE PROBE FOR SECOND: Is there another issue you'd like to hear about? (OPEN-ENDED. RECORD VERBATIM RESPONSE IN ORDER OF MENTION. ACCEPT UP TO TWO RESPONSES)

15. Which of these two descriptions comes closer to your view of what Medicare should look like in the future? (READ AND ROTATE)

	06/11	04/11
OPTION A: Medicare should continue as it is today, with the government providing health insurance and guaranteeing the same set of benefits to everyone enrolled in the program	49	49
OPTION B: Medicare should be changed to a system in which people choose their insurance from a list of private health plans that may offer different benefits at different premium amounts, and the government pays a fixed amount towards that cost	45	49
Other (Vol.)	2	1
Don't know/Refused	3	2

16. Some lawmakers have proposed changing Medicare to a system in which the government pays a fixed amount toward the cost of private health plans for seniors. I'm going to read you some arguments for and against this proposal. (First/next,) what if you heard that (INSERT AND RANDOMIZE). Would that make you (more) or (less) likely to support [this change to Medicare/READ EVERY 4TH TIME: changing Medicare to a system in which the government pays a fixed amount toward the cost of private health plans for seniors], or would it not make much difference either way? (ROTATE OPTIONS IN PARENTHESES ACROSS INTERVIEWS, BUT NOT WITHIN SAME INTERVIEW)

	More likely to support	Less likely to support	Not much difference	Don't know/Refused
a. Government payments will be greater for seniors who are poor or sick than for wealthy or healthy seniors	38	36	22	4
b. People now ages 55 and older will be able to remain in the current Medicare system and won't be subject to the proposed changes	51	18	27	4
c. Private plans will compete for seniors' business and seniors will be able to choose plans based on cost and quality	50	23	23	4
d. This proposal will help reduce the federal budget deficit by reducing Medicare spending over time	40	29	27	5
e. Without this change, Medicare's costs will be unsustainable and the program will not be able to pay its bills for future generations	30	38	26	6
f. This proposed change will eliminate Medicare as we know it	19	53	22	5
g. This proposed change will put private insurance companies in charge of deciding what benefits people on Medicare receive and how much they pay	21	55	20	4
h. This change will increase costs for seniors, who will pay more for their health care than they would under traditional Medicare	18	56	21	5
i. Moving seniors into private health insurance plans will increase costs because the cost of these plans have grown faster than Medicare's costs in recent years	19	48	27	6
j. The proposed plan also repeals the health reform law, and by doing that will eliminate some new Medicare benefits, like expanded coverage for prescription drugs for people who have reached the Medicare's "doughnut hole" or coverage gap	29	41	24	6
